EDUCATION

Bachelor of Engineering (Computers)

Jul 2002 – Jun 2006

First Class, Vidyavardhini College of Engineering and Technology

ACADEMIC EXPERIENCE

- developed the parser, query execution engine and GUI for **The Distributed DataBase (TDDB)**, a true distributed database built from the ground up, which conforms to the SQL-92 syntax
- developed a highly-available, concurrent mail server in Java, extensible through web-services
- conducted workshops & seminars on various topics, including databases, programming and graphics
- developed a book exchange site, where students could request for and put up books for lending
- was the college web-master, maintained the website and on-line registrations for various events

CAREER

Neorithm Technologies

🌐 <http://www.neorithm.com>

Tech Lead

Oct 2008 - Present

Core team member since inception, led the technology R&D across the company's product lines

Finacus Solutions

🌐 <http://www.finacus.com>

Senior Software Engineer

Nov 2007 - Aug 2008

Core team member, enabled rapid application development with an in-house framework

Amdocs Development Centre (India)

🌐 <http://www.amdocs.com>

Subject Matter Expert

Aug 2006 - Oct 2007

Implemented Amdocs' telecom billing functionality using Unix processes

PROFESSIONAL EXPERIENCE

- neorithm**
- developed a rule engine to filter 'interesting' transactions in a bank, which led to an **anti money laundering** product
 - developed a **business intelligence** product, where a financial institutions' relational data is imported into a SSAS cube, and analyzed in a pivot table built in Flex
 - developed a C# API to emulate a **versioned filesystem**, with pluggable storage support; in particular, a file-system and a relational database back-ends are ready
 - oversaw the development of a **loan origination system**, where potential customers were identified and clustered based on various financial, demographic and personal parameters
 - undertook **consulting assignments** on behalf of neorithm for performance optimization
- Finacus**
- developed an **enterprise application development framework**, consisting of workflows, an ORM framework, message queues; and code generators for an ASP.Net based UI
 - assisted in the development of an **ATM switch**, which could be theoretically support any ATM protocol; in particular, the Diebold and NCR protocols were developed
 - played a major role in improving the **usability** of web applications, using JavaScript to bring desktop-like features to web applications
- Amdocs**
- worked on extending the functionality of Amdocs' '**Rater**' product for two successive versions, writing **shell scripts and C++ daemons**
 - travelled to Israel for testing, and to Russia for production support of 'Rater' deployment

SKILLS

Languages

- proficient in C#, C, C++, shell scripting
- working experience with Python, Ruby, Java

Frameworks

- OR Mapping frameworks (NHibernate, Microsoft Entity Framework, Gentle.Net)
- Web frameworks (Google AppEngine (Python), ASP.Net, Google AJAX API, jQuery)

Data

- used MDX/DMX queries for data mining on Microsoft Analysis Services
- working experience with Microsoft Reporting Services

EXTRACURRICULAR ACTIVITIES

- won many programming contests around the Mumbai University campus during engineering studies
- received accolades and special bonuses while working in Amdocs DVCI
- listen to ColdPlay, Beatles, Dido; read P.G. Wodehouse, John Grisham; play cricket
